

Dropbox Business

The secure home for all your work

Dropbox Business lets your team bring work anywhere, syncing their important files across all their devices. Powerful admin tools help you stay on top of your account and take control of your organization's information. Shared folders and links help keep everyone up to date, effortlessly. With Dropbox, team members can work together like they're sitting right next to each other — even when they're halfway around the world.

Manage your team

Get up and running

Seamlessly upgrade existing Dropbox accounts to Dropbox Business, and transfer files to co-workers when people leave.

Centralize administration

Let your team focus on work — the admin console gives you one place to easily add or remove members, change team settings, and pay bills. Tiered admin roles let you manage your team more effectively by choosing one of three access levels for admins.

Gain visibility

Keep tabs on how your team's using Dropbox Business and what's being shared. Filter by specific actions and generate activity reports from the admin console.

Simplify provisioning

Dropbox has partnered with trusted identity providers so you can use your existing onboarding and authentication processes.

Better collaboration and productivity

Share with just a click

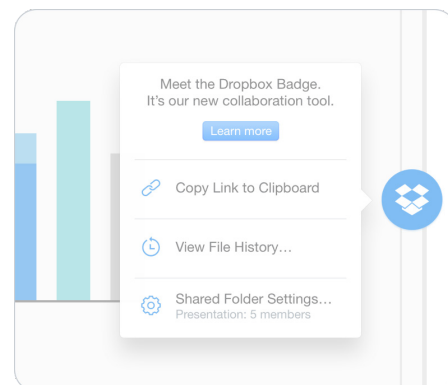

Forget zipping a large file to send as an email attachment. When you link to the file in Dropbox, clients can view or download the latest version in seconds. You can also create groups to make sharing with the multiple people at the same time even easier.

Give the right people the right access

Dropbox Business gives you control over permissions to shared folders and links, and lets you restrict members from sharing outside your team. You can also set limits on who can view or edit files within a shared folder, and protect shared links with passwords and expirations.

Simplify your workflow

Quickly find what you need by typing any word contained in a file with full-text search. With the Dropbox badge, see who's working on a shared Microsoft Office file and more from within the document. And comments let you keep discussions together with shared files.

Safeguard company data

Protect files in transit and at rest

Your files are stored using 256-bit AES encryption, and SSL/TLS creates a secure tunnel for data transfers between you and us.

Protect business data

If a device is lost or someone leaves your team, remotely delete the Dropbox folder to keep your business's most important data safe. Further protect data with the ability to disable shared links from the admin console.

Put data in its place

Let every employee access both a personal and a work Dropbox, while keeping them separate on all their devices.

Get reliable access

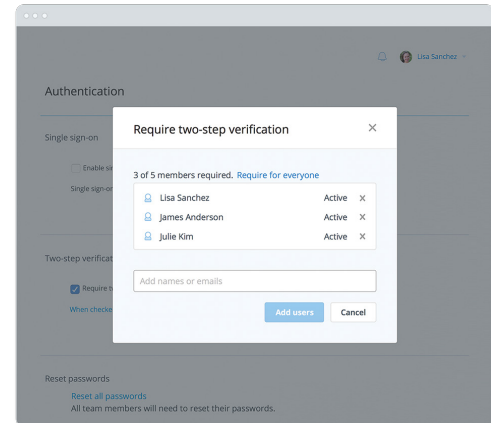

Keep your work available with storage designed for 99.999999999% durability.

Manage compliance

Dropbox, our data centers, and our managed service provider undergo regular third-party audits. Our SOC 1, 2, and 3 audit reports are available, as are our ISO 27001 and 27018 certificates. In addition, we sign BAAs with customers who require them in order to comply with HIPAA/HITECH. And Dropbox is a member of CSA's Security, Trust & Assurance Registry (STAR).

Guard user accounts

Put a trusted identity provider in charge of authentication with single sign-on (SSO), and add an additional layer of protection by securing Dropbox accounts with two-step verification.

Maintain privacy

Our privacy policy is designed to safeguard the collection, use, and disclosure of your business' information, and we comply with the U.S.–E.U. and U.S.–Swiss Safe Harbor frameworks.

Integrate with your workflows

Extend the capabilities of Dropbox Business and seamlessly integrate your core IT processes with SIEM, DLP, eDiscovery, DRM, data migration, and identity management solutions from industry-leading providers.

Three reasons to choose Dropbox Business today

1. Cost savings and productivity gains

Deploying a solution that people want to use, with no training required, means that your team can work the way they want to work with little effort on your part. They'll see you as a hero, and you can spend less time on pesky support tickets and more time on higher value-add projects.

Collaboration is at the heart of any company, and Dropbox Business allows employees to share seamlessly with their colleagues. Our data shows that collaboration in large companies* increases 2X following a Dropbox Business deployment, and file uploads increases 6X.

Organizations deploying Dropbox Business saw:

57.1% decrease in # of lost files

Earning 860% return on investment

Benefits of over \$1M per 100 users over 5 years

“Dropbox keeps our one IT guy working on the ‘everything else.’ He is not spending time on file storage and can spend time on computer hardware, software licenses, and network connectivity.”

—IDC White Paper sponsored by Dropbox, The Business Value of Dropbox for Business, Doc #252352, November 2014

2. Features to work smarter

Dropbox Business is the Dropbox you know and love with the admin controls and security features that businesses need.

We take Dropbox Business customer needs seriously and together we can build the collaboration platform of the future.

3. The Dropbox network

Since Dropbox is widely loved and adopted, we have a large network of engaged users that will organically grow even stronger on its own. But we want to continue making Dropbox Business the universal tool that's synonymous with collaboration so we're also growing our network of partners and developers.

We already integrate with Microsoft and Salesforce.com so your team can be even more productive with the tools they already use. And, the Dropbox Business API helps extend the reach of our network so you can give your team the tools they need to do their best work, within a platform that allows them to share that work with their colleagues.

National Geographic

National Geographic eliminated the shipping costs of sending hard drives back and forth by storing everything in Dropbox. And **Active Directory and Okta SSO** allowed IT to add another measure of security to protect their intellectual property.

GIW Industries

Since GIW Industries discovered Dropbox through their IT solutions provider, Dell, they've seen drastic improvements in mobile productivity and an **80% reduction in IT requests**.

Children's Miracle Hospital Network

The ability to lock shared folders for editing, as well as set **passwords and expirations** for shared links, gives Children's Miracle Hospital Network confidence for secure sharing both inside and outside its network.

Avison Young

Employees at 43 different real estate offices stay connected through shared folders, **working across locations** on budget development and acquisition planning.

BCBG MAXAZRIA

Dropbox Business enables **instant sharing** of designs globally, eliminating the need for FTP and speeding the creation of couture designs for the leading global retailer of high end fashion.

KIPP Houston Public Schools

The familiar user interface of Dropbox Business allowed for seamless deployment and limited training across the KIPP Houston public school organization. They now have a **central repository** for educational files and videos, as well as administrative documents and invoices.
